Driving Controls

Set Driving Speed		Drag the handle left (slow) or right (fast) to adjust the max speed of the Smart Presence™ system
Keyboard Controls		Press and hold the arrow keys or WSAD to start driving. Hold Shift to go faster.
Mouse Controls		Click and drag the mouse inside the navigation view (bottom) to drive. The guides will show your predicted path and rate of speed.
Gamepad Controls		Hold down the "drive" button and use the right control stick to begin driving. The speed is determined by how far you move the stick away from center.
